

December 1992/January 1993

Editor: Tim O'Sullivan, KE8OC

Here comes Santa Claus!

It seems like I just finished doing this, and here we are, time for another edition. It's hard to believe that the contest season is half over. I was planning to get this out before the ARRL 10m contest, so's we could whip up the troops for that last push before halftime, and for what could be the last chance for a record score this cycle, but that didn't happen. Propagation seems to have been pretty good this fall and we have some good scores to show for it. But, the score won't count unless you send the logs in, so keep them entries commin' in folks. As this is comming to you in mid-december, I hope 4K0SC (Santa) brings you something real good for X-mas, like an ICOM 781, or a new 55G tower with the stacked monobanders and the prop-pitch rotors of coarse. Or maybe its the plane tickets for the DX-pedition to Tahiti...well,as long as you're dreaming...

From the "BIG FISH"

Due to circumstances beyond our control, there is no fish column this issue. Between the US Mail losing the first disk Steve sent and erasing the second disk he sent, we've run out of time to try for the proverbial charmed third disk. Oh Well... Steve would like to congratulate many of the MRRC members for their outstanding efforts to post big scores over the last few contests, keep up the good work!

We hope to see every one at the 16th Annual K8MR Christmas party and MRRC meeting on January 9, 1993 starting around 7:30pm. Over the years, this has been one of the better attended meetings we have, and it is likely you will see folks who may have been inactive in recent years, come and get re-aquainted. A map and details are included elsewhere in this issue.

If you think that this issue is a little thin, thats because you haven't written anything to share with the rest of us. We (I) are always looking for articals to grace the pages of this rag. Articles on operating tips, DX-peditions, product reviews,etc. are welcomed.

Dayton will be here before you know it, and that means a certian Railroad ride for willing individuals, so if you're inclined to serve, let Steve know.

That about covers it for now, don't forget the January VHF Sweepstakes for all of you closet spacers out there. The rest of you, get ready for the second half. See you at Jims!

**The MAD RIVER RADIO CLUB net
occurs every Monday evening at
8:30pm EST on 3825 Khz ± QRM.**
